- AURAK -

CREATOR OF EXCEPTIONAL HELMETS AND GOGGLES

*A LUXURY FASHION BRAND,
UNDERPINNED BY FRENCH DESIGN*

- SIGNATURE -

LUXURY AND ELEGANCE

We take the greatest care in making our AURAK helmets. 70% hand-sewn, the work that goes into each AURAK helmet stands testament to singular craftsmanship.

Our core philosophy?

Selecting only the finest suppliers so that we can deliver cutting edge helmets that deftly blend comfort, safety, and design. Our range is based on quality materials like full grain Italian leather, which is hardwearing, but also soft and gentle to the touch.

Our helmets are lined with microfibre fabric, so that they stay as dry as possible. On some of our helmets, the vents are made from brushed metal, copper or rose gold, and are all fitted by hand. All of our materials are REACH embroidered and certified.

OUR VALUES

*MANUFACTURED WITH RESPECT
FOR PEOPLE AND THE ENVIRONMENT*

Respect for people and the planet is one of our core brand values. These criteria are apparent in the materials we use and in our assembly plant. Most of our materials are REACH certified, free from harmful colourings and dyes. By choosing to adhere to this particularly stringent standard, AURAK is expressing its commitment to protecting both the environment and the quality of our workers' lives.

Info:

The REACH standard ensures - amongst other things - that any materials in contact with the user's skin are free of chromium VI oxide.

The chromium IV oxide contained in dyes can cause serious skin burns for sensitive users, as well as for workers handling the dyes all day long.

HIGHEST SAFETY LEVEL

*WE LEARNED HOW TO ENHANCE SAFETY
BY WORKING IN THE WORLD OF MOTOBIKES*

Drawing on years of experience with motorbikes and the expertise we have developed, we have designed an ABS helmet that is 2mm thick on top and 2.5mm on the sides. More demanding than standard tests, we have enhanced the safety of our helmets by increasing the EPS thickness without compromising on their highly compact design, delivering high levels of protection and excellent panoramic ventilation. Our AURAK helmet combines safety and aesthetics, letting you enjoy each moment to the full.

AURAK

HIGHLY
FASHIONABLE
INNER
DESIGN

MAXIMUM COMFORT

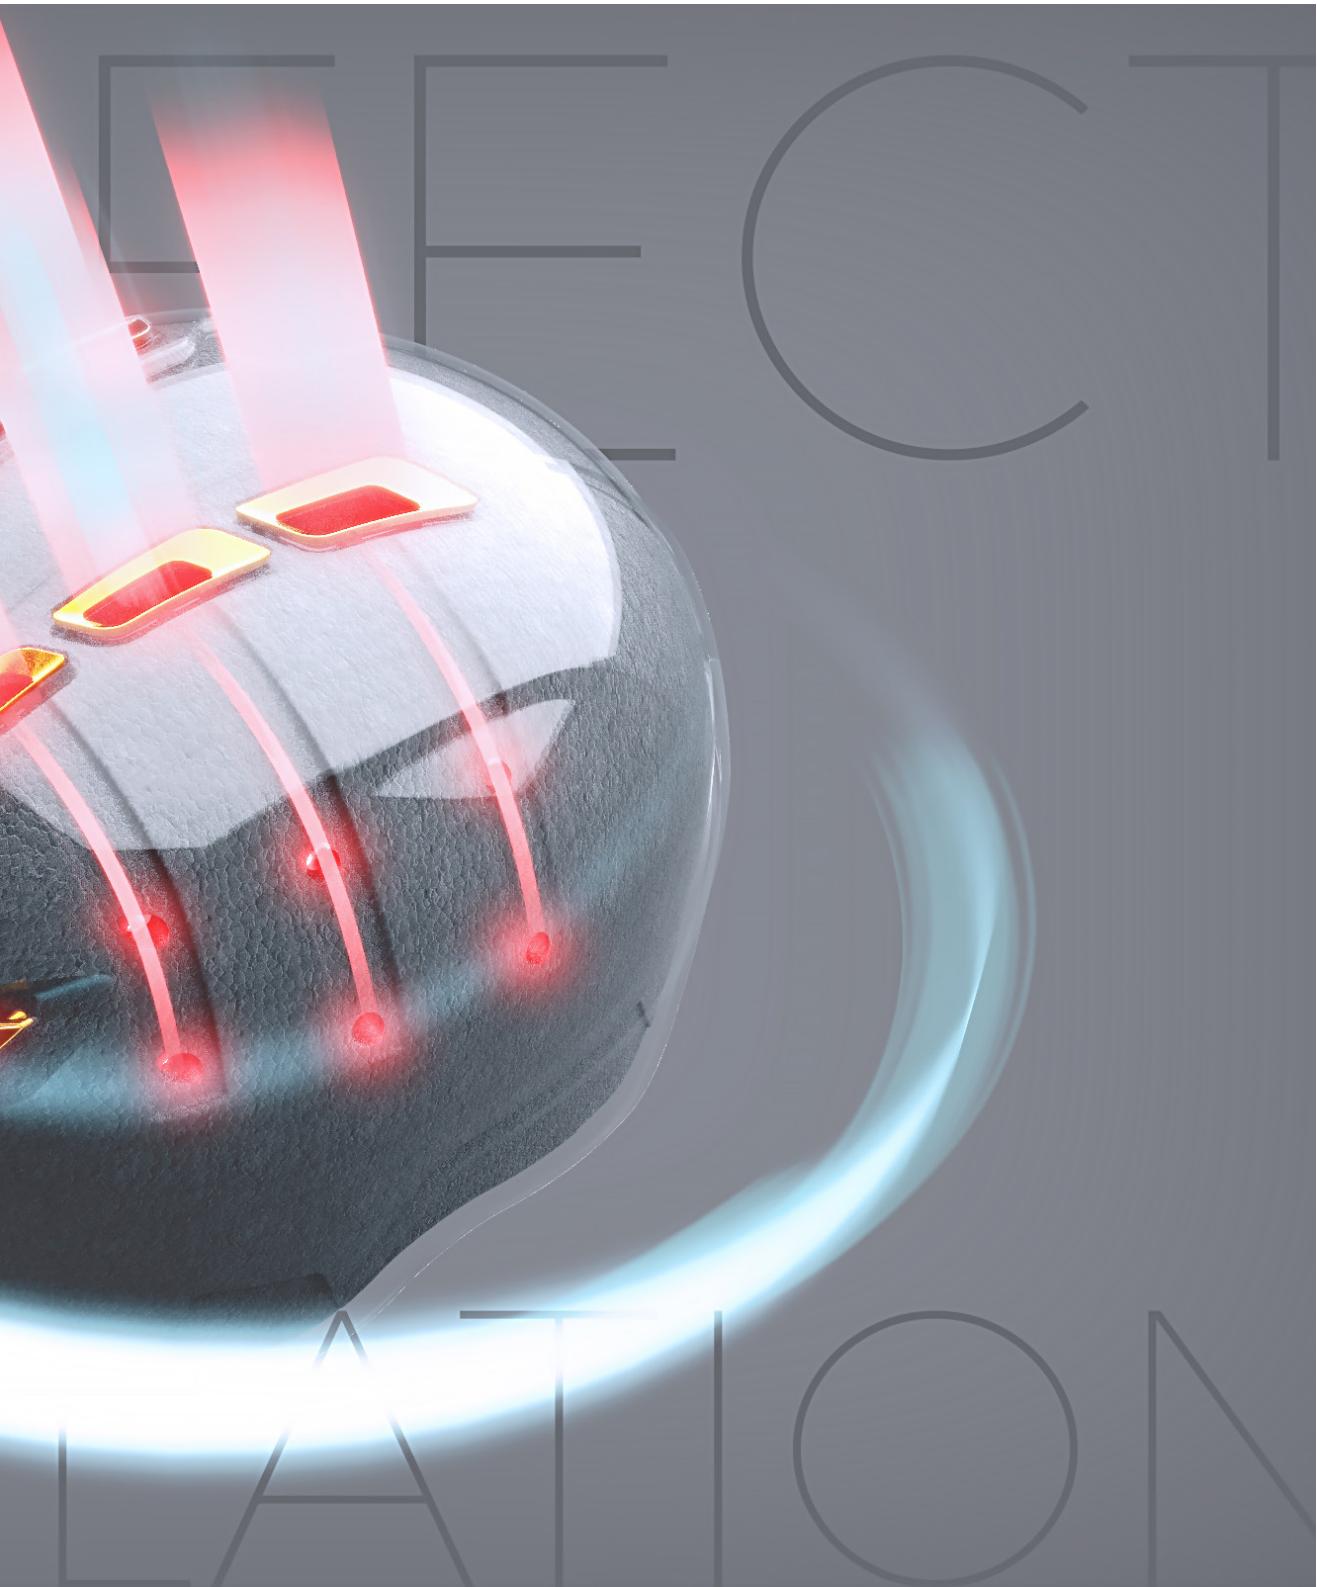

With a reinforced inner lining, our helmets deliver levels of comfort that have never before been seen in the world of horse riding. Inspired by motorbiking, we have designed a helmet with 13 padded cushions around the head, and another embroidered pad along the crown.

Every step of the design process is conceived so that our helmets offer you unrivalled comfort through cutting edge design.

PERFECT INTERNAL VENTILATION WITHOUT ANY SETTINGS REQUIRED

*UNIQUE INNER TEMPERATURE
REGULATION TECHNOLOGY*

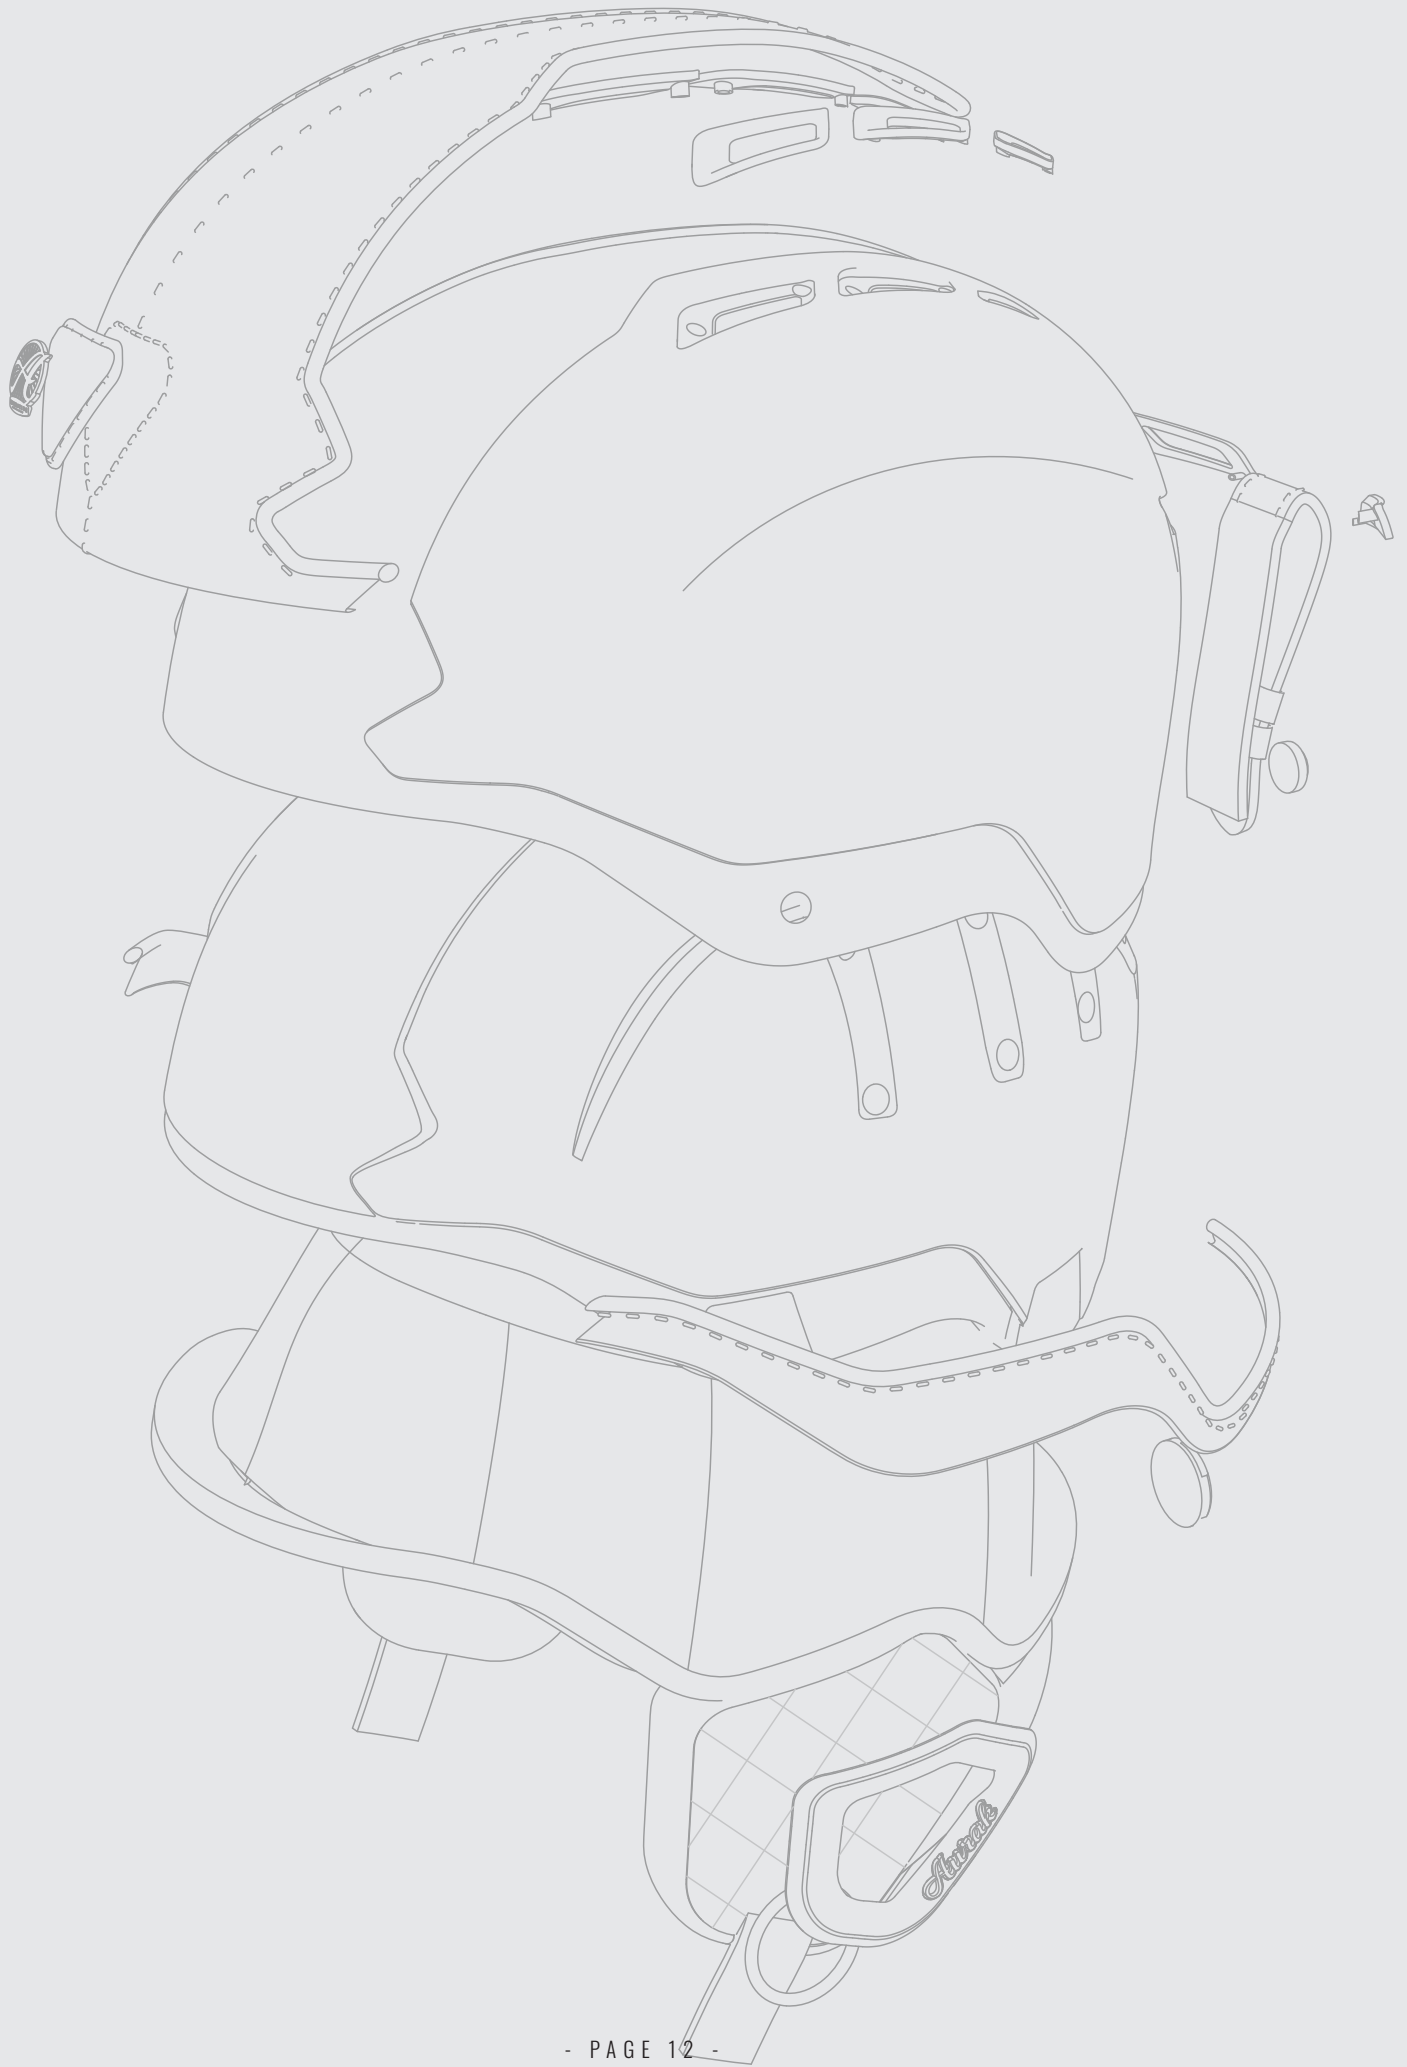

20 air outputs all around the head, with an exclusive ribbed design allowing for hot air extraction with no settings required. The various openings are perfectly sized and positioned so no unsightly opening or fastening systems are required. Add to this our microfibre humidity regulation effect and you have the best ventilation ever designed - for optimal comfort regardless of the weather.

*FRENCH
KNOW-HOW*

A close-up, low-angle shot of a dark, possibly black, helmet. The focus is on three gold-colored, rectangular vents arranged vertically on the side of the helmet. The lighting is dramatic, highlighting the metallic sheen of the vents against the dark, matte surface of the helmet. The background is dark and out of focus.

Our helmets

Our helmets are all sewn, overstitched and assembled entirely by hand. This means that each and every one of our helmets is a unique product, and slight differences may be noticed between two helmets that are the same model.

SMALL PEAK**BIG PEAK****JACQUARD**

Our Jacquard model proudly displays a modern Baroque-type pattern obtained by interweaving the threads.

Size: S(53-55), M(56-58), L(59-61)
